16 channels RS485/422 Distributor 1U 19"

- Data signal distributor used in the system when an RS485 data signal must be distributed in more than one direction.
- The data signal is distributed as four to sixteen separate outputs, and you can daisy-chain each output to one or more domes and receivers.
- The EE-RS series can receive two kinds of signals: RS232 or RS485/422. Baud rate 2400/4800/9600 bps
- TVS 1500W lightning proof and 1500 MA surge proof
- 4, 8, 12, 16 channels output models optional, each channels supports transmitting distance of 1200m (0.56 mm twisted-pair wire)

Model Number	EE-RS016-1U
Supplied Power	DC 12V
Power consumption	≤24W
Receiving Control Mode	RS485/RS232
Sending Control Mode	RS485
Receiving Baud rate	2400/4800/9600bps
Sending Baud rate	2400/4800/9600bps
Farthest Transfer Distance	1200m(0.56 mm twisted-pair wire)
Operating Temperature	0~50℃
Operating Humidity	≤90%
Dimension	430mmx210mmx44mm
Weight	2.85kg

Model Number	Description
EE-RS004-1U	1 Input 4 Outputs
EE-RS008-1U	1 Input 8 Outputs
EE-RS012-1U	1 Input 12 Outputs
EE-RS016-1U	1 Input 16 Outputs
